EDUCATION

Chandigarh University, Punjab, India

2020 — 2024

- Major in Bachelor in Computer Science Engineering.
- CGPA: 7.76

Skyrider College, Nepal

2018 — 2020

- Intermediate Level
- GPA: 3.30

PROJECTS

Realstate Website

- Engineered a comprehensive realstate website leveraging React.js and Tailwind CSS, implementing seamless data searching and sorting functionalities for enhanced user experience.
- Crafted an aesthetically pleasing user interface, emphasizing modern design principles to elevate the website's visual appeal.
- Employed context api and state management proficiently to manage and distribute application-level state, ensuring efficient data handling and improved performance across the platform.

Technologies: React js, Javascript, styled-components, Tailwind CSS [Live](#)

Netflix Clone Frontend

- Developed a responsive Netflix clone using React.js and Tailwind CSS, featuring user authentication through Firebase.
- Integrated API for dynamic movie content, leveraging React's state management for an efficient user interface.
- Implemented distinct state management solutions in React to ensure smooth data flow and user experience.

Technologies: React, Javascript, Tailwind CSS, Firebase, API [Live](#)

Next.js Blog with Firebase Integration

- Created a feature-rich blog website utilizing Next.js and Tailwind CSS, offering a responsive and modern user interface.
- Implemented user authentication and database storage using Firebase, enabling seamless login and secure data management.
- Enabled user interaction functionalities including liking and commenting, enhancing user engagement and interaction on the platform.

Technologies: Next js, Tailwind CSS, Firebase, Firebase Database [Live](#)

Napkin Paper E-commerce Platform (Next.js, TailwindCSS, Firebase)

- Development of an e-commerce platform dedicated to the Napkin paper industry, leveraging Next.js and CSS for a robust and responsive user interface.
- Implemented Redux for efficient product management and rendering, ensuring seamless showcasing of the industry-specific products, elevating user experience through organized and accessible product displays.
- Implemented searching and sorting functionalities, enhancing user navigation and facilitating streamlined product discovery within the e-commerce platform.

Technologies: Next js, Typescript, Tailwind CSS, Firebase, Redux

SKILLS

- Programming Language: Python, Javascript, C++
- Web & Database: HTML/CSS, React js, Next js, Tailwind CSS, Firebase, MERN stack
- Technical Skill: Git, Github, VS Code, Vercel
- Languages: Nepali, English
